

EMSTrainer - Instructor Quick Start Guide

Version: 1.6.1

Overview

EMSTrainer helps you create, deploy, and grade training scenarios and assessments without technical knowledge. Everything is done through natural conversation with AI.

What You Can Do

Scenario Management:

Assessment Creation:

Getting Started

Prerequisites:

Setup (2 steps):

Step 1: Load Core.txt

Step 2: Load Scenario Mode (if creating scenarios)

Creating Scenarios

Simple Method (AI Generates):

AI will generate complete scenario JSON with:

Advanced Method (Customize):

Using Example Scenarios:

Load example from examples/ folder and modify:

Deploying to Students

Option A: Email Distribution

AI creates email template with:

Option B: File Distribution

AI generates:

Grading Submissions

Auto-Grading:

AI provides:

Class Summary:

AI creates:

Creating Tests & Study Guides

Custom Test Questions:

Study Guide Generation:

Topic-Specific:

Difficulty Levels Explained

Easy: Learning-focused, supportive, no penalties

Example Scenarios Included

Located in examples/ folder:

Use these as templates or modify as needed.

File Organization

Recommended structure:

Tips for Effective Use

Scenario Creation:

Assessment:

Grading:

Common Instructor Tasks

Weekly Skills Check:

Pre-Shift Scenarios:

Remediation:

Progress Tracking:

Troubleshooting

Issue: Scenario too easy/hard for students

Issue: Auto-grade seems incorrect

Issue: Students confused by instructions
