

EMSTrainer - Student Quick Start Guide

Version: 1.6.1

What is EMSTrainer?

EMSTrainer is an AI-powered training system that helps you:

Prerequisites

Required:

Helpful:

Uploading Your Test Results (Optional)

If you have test results from PlatinumPlanner, you can upload them to get personalized training focused on your weak areas.

How to Download Test Results from PlatinumPlanner:

Step 1: Locate the completed EMSTest section in the lower-left column of the dashboard and click "Test Results".

Step 2: Click "Next Page" twice to proceed to the final results page.

Step 3: Click on the "National Registry ALS" tab, then click the "Export National Registry ALS Results" button to download your test results.

Step 4: Save the file and upload it to EMSTrainer to receive personalized training content based on your weakest skill areas.

Getting Started (3 Easy Steps)

Step 1: Load the Core Prompt

That's it! You now have access to Test and Study modes.

Step 2: Choose Your Mode

The AI will generate targeted questions in those categories.

or

You'll need to load an additional file first:

Common Questions

Q: Can I pause a scenario and come back later?

Q: What is temporary chat mode?

Q: What if I disagree with the AI's answer?

Q: How do I know if I'm ready for my test?

Q: Can I create my own scenarios?

Q: What's the difference between modes?

Q: Do I need both prompt files?

Troubleshooting

Problem: AI doesn't recognize a command

Problem: Scenario seems too easy/hard

Problem: AI made a medical error

Problem: Not sure what to do next
