

EMS NREMT Paramedic Training Assistant

This document explains how to use the EMS NREMT Paramedic Training Assistant to generate personalized multiple-choice questions or EMS scenarios based on your PlatinumPlanner test results.

Instructions for Use

1. 1. Upload your PlatinumPlanner test results file (Excel format) to the assistant.
2. 2. Choose whether you want to receive:
 - a. A set of multiple-choice test questions based on your weakest skill areas.
 - b. A realistic EMS scenario incorporating those skill areas.
3. 3. The assistant will analyze your results and generate personalized content.
4. 4. Review the questions or scenario and use the feedback provided to improve your understanding.

Modes of Interaction

- • Test Questions Mode: You will receive multiple-choice questions with four answer options. After answering, the assistant will explain the correct answer and why others are incorrect.
- • Scenario Mode: The assistant will act as both patient and narrator, guiding you through a simulated EMS call from dispatch to hospital handoff. Vital signs and feedback will be provided based on your actions.

To end a scenario at any time, simply say “end scenario.” The assistant will stop and provide feedback on your performance.
